

FOR OPERATORS, IPPS AND DEVELOPERS

Verified sites, developed through to grid connection.

We develop solar PV and stand-alone storage (BESS) projects for and with our partners, from 1 to more than 50 MW per site, in France, Spain, Italy and Bulgaria.

LOTS LISTED IN OUR CATALOGUE	TO A READY-TO-BUILD PROJECT, BY COUNTRY	PER SITE, SOLAR PV OR STORAGE	FRANCE, SPAIN, ITALY AND BULGARIA
2,000+	12 to 30 months*	1 to 50+ MW	4 markets

A model that adapts to every situation

Fees, milestones or equity: remuneration is built with each partner. Permits and contracts are issued in the name of the project company.

Greenfield development

From land to ready-to-build: land, grid connection and permits, on behalf of our partner.

RTB project sourcing

Identifying and qualifying ready-to-build or advanced projects to your size, country and technology criteria.

Co-development

Taking over or accelerating projects under way, where they are stuck.

Equity stakes

Depending on the project, a stake in the project company (SPV) alongside our partners.

* Indicative timelines, varying by country, technology and connection regime.

What we bring

A land catalogue

More than 2,000 industrial and agricultural plots, updated every week through our networks.

Connection and flexibility

Reading grid capacity and connection regimes in each country, including new flexible access.

Land and permits

A country-by-country reading of industrial and agricultural land and local procedures.

Revenue stacking

Capacity markets, storage auctions and public support, depending on the country.

Team and company

A dedicated team per partner. The contracting company is Tierra Solar EDPK, a Bulgarian company headquartered in Sofia.

Confidentiality

We sign a non-disclosure agreement before sharing any site. We never name our partners without their written consent.

Let's talk about your land, your municipality or your project.

contact@tierrasolar.eu

We reply within two working days. Your data is used only to answer you and is never shared.
